PROFESSIONAL SUMMARY

Frontend Developer with 4+ years of production experience building a multi-role SaaS CRM platform at DigitalBuzz — a performance marketing agency serving 20+ enterprise real estate clients including Lodha, Mahindra, Hiranandani, and Adani Realty. Specialised in React.js, Redux Toolkit, and TypeScript, with a strong track record in reusable component architecture, performance-optimised dashboards handling 10,000+ records, real-time features (Socket.io), and tested, maintainable code (Jest + RTL). Proven ability to lead frontend delivery end-to-end in agile product teams.

PROFESSIONAL EXPERIENCE

Software Engineer — Frontend | **DigitalBuzz LLP** Feb 2025 – Present

SaaS CRM platform powering sales, marketing, and admin workflows for a real estate performance marketing agency serving Lodha, Mahindra, Adani Realty, and 17+ other enterprise clients.

- Architected a shared component library of 30+ reusable UI elements, reducing code duplication by ~40% and accelerating feature delivery across teams
- Built interactive dashboards with real-time filtering, sorting, and pagination efficiently handling 10,000+ records — measured a ~30% rendering improvement using React DevTools Profiler after introducing useMemo, useCallback, and React.memo
- Designed scalable API integration layer using Redux Toolkit's createAsyncThunk, standardising async state and error handling across 15+ feature modules
- Migrated core feature modules to TypeScript, enforcing strict prop types and reducing runtime type errors across the platform
- Built real-time in-app chat module using WebSockets (Socket.io), enabling live communication between CRM users — group and direct messaging supported
- Maintained deployment pipeline on Azure DevOps — code reviews, merge conflict resolution, and build monitoring across dev-to-prod workflow

Frontend Developer | **DigitalBuzz LLP** Jul 2023 – Feb 2025

- Independently developed 5+ feature modules including leads management, campaign tracking, and user settings — each shipped end-to-end from design handoff to production
- Built a configurable data table system using React Table with sorting, filtering, and pagination; adopted platform-wide across 8+ CRM modules
- Implemented unit and integration tests using Jest and React Testing Library for the data table component, covering filtering, search, pagination, and API states — reducing regression bugs significantly
- Delivered campaign analytics dashboards giving marketing teams full visibility into open rates, clicks, and conversions
- Integrated 20+ REST APIs using Axios and Redux Toolkit's createAsyncThunk, with unified loading/error state handling for consistent UX
- Reduced unnecessary re-renders by introducing memoisation patterns and component-level code splitting across key modules

Junior Frontend Developer | **DigitalBuzz LLP** Jan 2022 – Jul 2023

- Built 15+ reusable UI components (forms, modals, buttons, tables, cards) in React and Tailwind CSS, aligned to Figma design specifications
- Implemented end-to-end client onboarding flow including OTP-based verification, reducing manual signup errors significantly
- Integrated REST APIs for leads, campaigns, and payment workflows — handling success, error, and loading states cleanly
- Collaborated in a 8-person agile team using Git (feature branching), Jira for sprint tracking, and Postman for API testing and documentation

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3
Frameworks & Libraries: React.js, Redux Toolkit, React Router, React Table, Tailwind CSS, Socket.io
State & API: Redux Toolkit (createAsyncThunk), REST APIs, Axios, Global State Management
Testing: Jest, React Testing Library — unit & integration tests
Real-time: WebSockets, Socket.io
Tools & Platforms: Git, GitHub, Azure DevOps (CI/CD pipeline), Jira, Postman, Figma, npm/yarn, Vercel
Practices: Agile/Scrum, Component-driven Development, Performance Optimisation, Code Splitting, Responsive UI

PROJECTS

Mini CRM Analytics Dashboard — *TypeScript, React.js, Redux Toolkit, Tailwind CSS, Chart.js* Live | GitHub

- Fully typed TypeScript CRM dashboard with role-based views, lead analytics charts, and campaign performance tables
- Demonstrates real-world CRM patterns: data tables with filtering/sorting, chart visualisations, and Redux-managed async state

Pingora — Real-time Chat App — *React.js, Firebase, Redux Toolkit, Tailwind CSS, React Router* | GitHub

- Real-time messaging app with direct and group chat, built on Firebase Realtime Database and React
- Features persistent auth, message threading, and live user presence indicators

Plannium — Daily Planner App — *React.js, Tailwind CSS, Local Storage* Live | GitHub

- Task and schedule management app with drag-and-drop prioritisation, persistent local state, and a clean responsive UI

EDUCATION

M.E. Environmental Engineering 2016 – 2018
Pune University

B.Tech Civil Engineering | Diploma in Network Security 2011 – 2015
Bharati Vidyapeeth Deemed University (completed concurrently)

PRIOR EXPERIENCE

Assistant Professor — Civil Engineering Feb 2019 – Nov 2021
Siddhant College of Engineering

- Taught engineering fundamentals to 100+ students; transitioned to software development bringing strong analytical thinking and structured problem-solving to technical roles
